Company profile 2026

Because everyone belongs

flexaccess.ae

About us

Flex Access was founded on a powerful truth

The spaces we live and work in should never limit our potential. We believe that every doorway, staircase, and public venue should be safe, welcoming, and accessible to everyone. Based in the UAE, we specialize in advanced accessibility engineering. We bridge the gap between architectural design and human need, providing solutions that empower People of Determination, the elderly, and individuals with mobility challenges to move with dignity and confidence.

flexaccess.ae

Our Mission

To dismantle physical barriers through safe, reliable, and compliant technologies. We empower individuals to live independently and participate fully in everyday life by delivering world-class accessibility infrastructure.

Our Vision

To lead the region in inclusive design, setting the benchmark for quality and innovation creating a world where every environment is accessible and welcoming to all.

OUR ACCESSIBLE SOLUTIONS CATEGORIES

Let's take a deeper look into each category to clearly understand its scope and how we deliver value through every solution.

- Accessibility Solutions
- Beach and Pool
- Accessible Vehicles
- Smart Homes
- Inclusive Mobility
- Doors & Parking

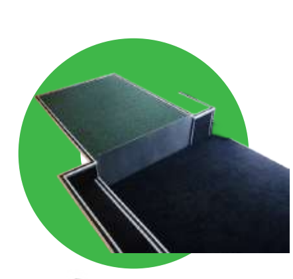
Accessibility Solutions

Overcoming Vertical Barriers Indoors and Outdoors Whether it is a small step at a shop entrance or a multi-level staircase in a private home, our accessibility solutions are designed to bridge the gap. We extend beyond just physical access to create environments that support the blind and individuals with autism. We focus on lifts, ramps, and tactile guidance systems that are safe, sturdy, and blend beautifully with your existing architecture.

Our Accessibility Solutions

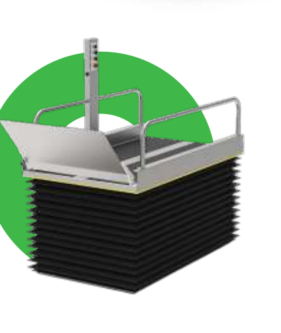
Flex Step

FLEX STEP (2-in-1 Solution) This innovative, compact solution functions as both an ordinary staircase and a wheelchair lift. It features a wide range of design options, making it easy to integrate into existing rooms and decor styles.



HDN The Hidden Lift

HDN (The Hidden Lift) is the essen of modern innovation, this lift is concealed flush with the floor when not in use, making it hardly noticeable. It is an aesthetic and practical solution ideal for shop and office entrances where design is paramount.



Liftboy 1,2,3

LIFTBOY 1, 2, 3 is the ideal solution for smaller height differences of up to 97 cm. These lifts are available in three different types to suit various weight capacities and platform widths.

Easy Lift

EASY LIFT (Vertical Platform Lift) is a flexible lifting platform designed with straight lines and flat surfaces, combining problem-free elegance with robust construction. It is suitable for both indoor and outdoor use and ensures comfortable access for height differences of up to 1.35 meters.

Sigma

SIGMA (Vertical Platform Lift) is a premium vertical platform lift that combines aesthetics and safety in a single product. With numerous sophisticated details, it serves as the perfect mobility solution for both private and public spaces, lifting up to 3 meters.

Liftboy 4

LIFTBOY 4 is a versatile mobile platform designed for indoor and outdoor use. Originally developed to transport wheelchair users between train carriages and platforms, it is also frequently used on theater or concert stages.

Liftboy 5

LIFTBOY 5 is a unique vertical wheelchair lift featuring a double-scissor mechanism powered purely electrically. It is a compact solution capable of lifting up to 1300 mm.

Stepsaver

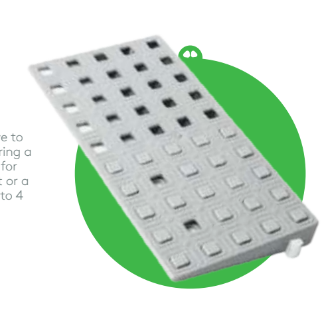
STEPSAVER is a flexible and cost-effective solution for small height differences, suitable for staircases with up to two steps. It installs easily without compromising the usability of the existing stairs, making it a great alternative to expensive conversions.

Elevex

ELEVEX is a robust, simple, and cost-effective platform lift designed specifically for overcoming height differences outdoors. It can handle heights up to 1829 mm.

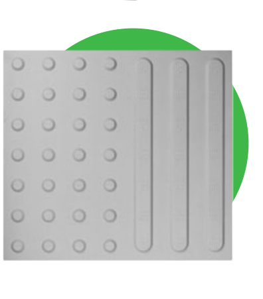
Alpin

ALPIN is an efficient alternative to traditional outdoor lifts, featuring a space-saving design. It allows for installation without a lift shaft or a shaft pit, reaching heights up to 4 meters.



Ramp Customized

Customized Ramp Durable, non-slip ramps tailored to fit any residential space. These are designed to ensure safe and smooth movement over thresholds and steps.



Tactile System

Tactile System Guidance paths and warning surfaces designed for visually impaired users. These flooring systems help individuals navigate public spaces safely and independently.
